HackIndia Hub

Never miss a hackathon again.

One place to discover hackathons across India, find teammates, and get reminded before deadlines.

Project demo | Built with HTML, CSS, JavaScript

WHY THIS PROJECT

The Problem

- Hackathons are announced on many different places: Devfolio, Unstop, college sites, Smart India Hackathon.
- Students miss deadlines because there is no single list to check.
- Hard to know which events suit your skills, year or city.
- Finding good teammates is mostly luck and random WhatsApp groups.
- Fake or expired listings waste students' time.

WHAT WE BUILT

The Solution: HackIndia Hub

A single, searchable and personalized hackathon platform for Indian college students.

Discover

Search and filter every hackathon in one directory.

Connect

Find teammates by role, skills and experience.

Stay on track

Save events, add to calendar, get deadline alerts.

AT A GLANCE

Key Features

Discover directory

Cards with deadline, prize, mode and tags.

Interactive India map

Click states and hubs to explore events.

Find teammates

Post a request or send a join pitch.

For You dashboard

Saved events and matches from your profile.

AI assistant

Chat drawer with quick questions for beginners.

Alerts, calendar, share

Bell alerts, .ics export, WhatsApp share.

Post a hackathon

Organizers submit events for verification.

Admin control room

Review submissions and user reports.

FOLLOW ALONG

Live Demo Flow

1 Search

Type 'AI' or 'Hyderabad' in the hero search bar or tap a quick chip.

2 Filter

Use the sidebar: state, mode, technology, difficulty, prize.

3 Open details

Read overview, tracks, prizes, timeline and FAQs in tabs.

4 Act

Save it, add to calendar, share on WhatsApp, or register.

5 Team up

Go to Find Teammates and post or join a request.

6 Personalize

Open For You to see matches; ask the AI assistant.

DISCOVER VIEW

Smart Filters

Location / State	12 options incl. Online-only and All India
Event mode	Online, Offline or Hybrid
Technology	AI/ML, GenAI, Web, App, Cyber, Web3, IoT, Cloud, Data
Difficulty	Beginner, Intermediate, Advanced
Eligibility	College students, 1st-2nd year friendly, open to all
Minimum prize	1 Lakh, 5 Lakh, 10 Lakh, 25 Lakh and above
Sort by	Deadline, prize pool, popularity, newest

COLLABORATION

Teammates and AI Assistant

Find Teammates

Post a request: target hackathon, role needed, what you will build, skills, team size (2-6), experience level, contact. Filter by role (Frontend, Backend, AI/ML, Web3, UI/UX, Embedded) and experience. Interested students send a short pitch.

AI Matcher

A floating chat drawer. One tap asks: 'I'm a 1st-year beginner, where can I start?', 'Best AI hackathons near Hyderabad?', or 'What is a winning 4-person team formula?' Students can also type their own question.

PROTECTING STUDENTS

Trust and Safety

- Organizers must give an official email, registration link and a verification source URL.
- Every submission goes to the Admin queue before it is trusted.
- Any student can report a listing: fake link, expired, wrong prize or impersonation.
- Admin control room handles duplicate detection and report review.
- Every listing shows a verification box and a 'Verified' badge.

HOW IT IS BUILT

Technology Stack

HTML5

Semantic structure: header, nav, section, aside, footer

CSS3

3 files: global, components, map. CSS variables for theme

JavaScript

10 modules, no framework. Inline event handlers

SVG

Icons and the India map drawn as code

SEO + Open Graph

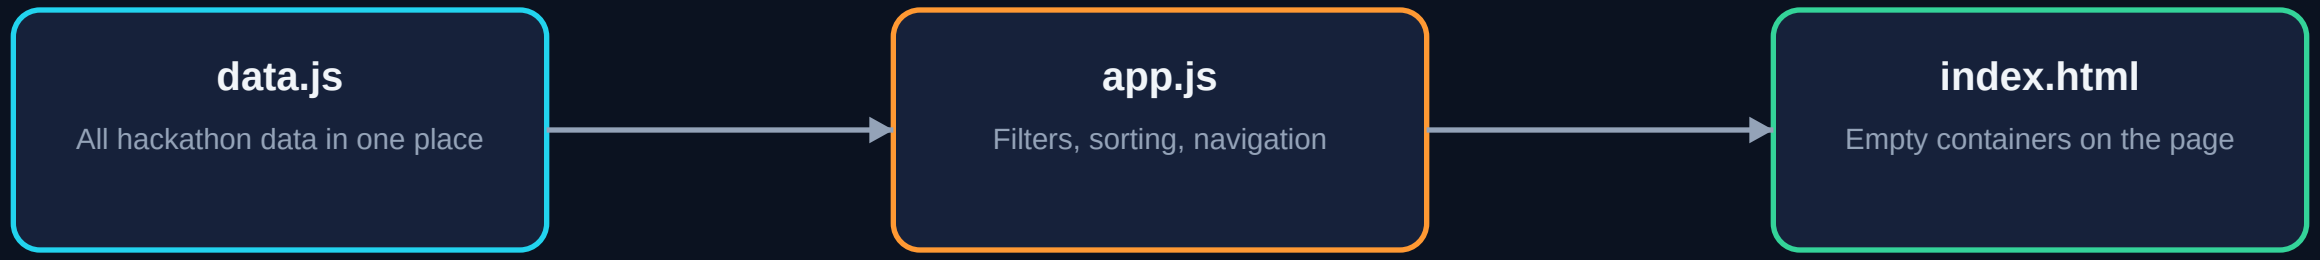
Google snippet and WhatsApp/Twitter preview cards

HTML5 forms

required, email, url, date, number validation

ARCHITECTURE

How It Works



teams.js
Teammate cards

dashboard.js
For You page

admin.js
Moderation queue

map.js
India map

notifications.js
Alerts

ai-assistant.js
Chat

Each feature file fills its own empty container in index.html. One file, one job.

FUTURE SCOPE

What's Next

- Real backend and database so profiles, teams and approvals persist across devices.
- User login and email verification for organizers.
- Live data feeds from Devfolio and Unstop, kept up to date automatically.
- WhatsApp deadline reminders sent for real.
- Accessibility upgrades: proper buttons, labels and keyboard navigation.
- Full-URL social preview image so shared links look great.
